Understock, Grisdale to Enter Government

Well defined reports received in Calgary Monday from Edmonton indicated that a long expected shake-up in the Alberta cabinet might be announced in the near future.

Indications were that F. S. Grisdale, U.F.A. member for Ods, would be taken into the government as minister of agriculture, conversations to this effect having taken place last week between Premier Brownlee, other members of the cabinet and Mr. Grisdale, and at least two of his supporters.

Although an official announcement might not be made for some time, it is understood that Mr. Grisdale tentatively agreed to accept the new post, and that Hon. George Headly, who has been carrying other portfolios in addition to that of agriculture, will confine his activities to the department of health, which he has headed for some years.

Prior to the Alberta elections of 1930 it was well known that Mr. Grisdale had been offered the ministry of agriculture, but plans for the shake-up failed to materialize after the return of the Brownlee government.—Calgary Herald.

WEEKLY SERMONETTE

"Blessedness is more a matter of disposition"—than "position."

Truck Burns on Highway

One of the big Dench trucks made a spectacular blaze on the highway 3 miles south of town early Wednesday morning when the truck and contents were totally destroyed.

The truck, which was loaded with drums of gasoline and oil together with other merchandise, caught fire under the footboard and on account of the inflammable load the only thing that could be done was to drive it into the ditch and let it burn itself out.

The driver jumped from the burning vehicle and was uninjured.

Will Build New Service Station.

The Stevens building at the corner of North Wall St. has been purchased by the Arctic Oil Co. of Lethbridge, and the building is being erected by Mr. Roger Barrett, who will utilize the lumber to build an up-to-date stucco service station on his property across the road.

Mr. Barrett will handle the products of the Arctic Oil Co.

Dr. and Mrs. Hartman of Ods were dinner guests at the home of Mr. and Mrs. McGhee on Monday evening.

Fish and Game Asso. has Large Membership

The sportsmen of the district have responded well to the membership drive for the Fish & Game Association.

Up to the present 81 membership cards have been issued and it is expected to bring this number up to at least 100 before the season is far advanced.

All who are interested in fishing and hunting should be members of the association and anyone interested can obtain membership cards from Messrs. C. H. Ashhead, J. A. McEwen, W. McFarquhar, A. Bruce, A. McNaughton or J. McGlow.

To Mr. C. H. Ashhead goes the honor of obtaining the largest number of members, having enrolled 52.

Ship Cattle East.

Five cars of cattle were shipped from the Didsbury yards to Toronto and Montreal last Thursday. In this shipment 110 head were owned by Mr. Abe Snyder and 14 head by Mr. Allen Hunsperger.

Suit Commenced Against Town of Ods

Claiming that she slipped and fell on the public sidewalk in Ods, which had been left in a state of disrepair, Mrs. Zella May Shackleton, a resident of Ods, commenced suit for damages against the town last Friday (the 18th). Mrs. Shackleton is asking \$3,500 damages, while her husband, Edwin James Shackleton, is asking for \$641.50 special damages to compensate him for expenses due to his wife's injury.—Ods Gazette.

Hospital "Aid" will be Organized

A Hospital Aid Society will be organized at a meeting to be held at the United Church on Saturday, June 2nd at 5 p.m., instead of 2, as more convenient.

A society of this kind can be of great help to the Hospital in sewing and providing fruit, vegetables, etc. as well as furnishings.

We understand that two representatives from each ladies organization both in town and country have been appointed to attend this meeting, but all ladies who are at all interested in this work are invited to attend.

Care Should Be Used When In The Forests

A number of Didsbury fishermen and campers saw an example of how forest fires can be started by careless motorists, on Sunday afternoon on the Big Red Deer near the Carlier Oilwell.

About 3 o'clock Forest Ranger Harvey had patrolled the neighborhood and saw no signs of fire, but at 4 p.m. Larry Leavens and party discovered a fire that had made considerable headway. It was quite evident that the fire had been started by a passing motorist in throwing a match or cigarette from the car.

In a short time a number of men had gathered and together with the forest ranger and his firefighting equipment they managed to extinguish the fire before any great damage had been done. The fire jumped the river and started a groundfire on the south side which had been got under control before the boys left.

Among the Didsbury boys who helped fight the fire were Bert Fisher, W. Smith, Elmer Evans, Ormond Philippon and Larry Leavens.—They all agree that they got a lesson to take care when in the forests.

I.O.D.E. Celebrate "Empire Day."

Empire Day was celebrated by Mons Chapter at the home of Mrs. Ross Ford last Wednesday evening. At the close of the regular meeting the following program was given:

Solo "There's a Land"..... Mrs. M. Sangstad
Essay "....." Empire Day..... Dorothy Kouschitz
Reading "....." England's Debt..... Mrs. J. A. Mettish
Piano Solo..... Betty Boerman
Recitation "....." St. Malo..... Lorna Carlton
Reading "....." Jacques Cartier..... Betty Boerman
Solo "....." The Veteran's Song..... Miss Sangstad accompanied by Mrs. E. Lister
Miss Listerman concluded the program with some delightful music, after which the Regent expressed the appreciation of the Chapter to the artists and program committee.

Wins Fishing Prize.

Ross Ford was winner of the prize given by Mies Hardware for the biggest trout caught over the holiday and weekend.

He brought in a fine trout 22 1/2 inches long and weighing 3-lb. 9-oz. The fish was caught in Stony Creek, a tributary of the James River.

The fishing appeared to be good all through the west country, and some very good catches were made. Jim Catlinson landed the second largest in the contest with a 22 inch trout weighing 2-lb. 12-oz., and Walter Herbert third with a 19-inch trout weighing 2-lb. 6-oz., both caught in the Big Red.

Charlie McMartin was unable to enter the contest, not having bought his license in Didsbury, but he made a catch that equaled the winner, his fish also measuring 22 1/2 inches and weighing 3-lb. 9-oz. This fish was also caught in Stony Creek. Tommy Johnson assisted with the net in landing the fish, and they say he had to get into the water to do it.

It is reported that a 33-inch fish was caught in the same creek over weekend.

Bill Smith and Bert Fisher went out to try for the prize. Bill says they had just got to where the fish were of real size when they were called off for fire duty.

Dr. Clarke reports that he caught the smallest fish.

Mr. Duce McEwen reports that he and his party caught 124 fish in Lake McGregor east of Vulcan, this weekend. Two pike caught weighed about 30 lb. each—Some fish!

Pet Show.

The C.P.R. ground was crowded Thursday morning last with the C.G.I.P. girls staged their annual pet show. There were ponies, dogs, puppies, cats and chickens, all decked out, and the kiddies seemed to have a good time.

The Didsbury Boys' Band played a number of selections during the morning.

The prizes were awarded to: Frank Moon, Shetland pony, 1st; Norma Jean Ayl, Shetland pony, 2nd; Hughie McElroy, 5 puppies, 3rd.

Painful Feet?

Foot Comfort Expert from Toronto will be here
MONDAY, JUNE 18th
To Give Free Demonstration

On the above date we will have at our store, through the courtesy of Dr. Wm. M. Zehed, famous foot authority, a Foot Comfort Expert from the east coast, sent here for the benefit of our patrons. We urge every foot sufferer to make the most of this unusual opportunity.

Over your aching feet, this Expert will make Pedo-graph prints, which will show the exact nature of your foot ailment. He will then demonstrate how the scientific appliances perfected by Dr. Zehed instantly relieve your painful feet.

Keeping Up Quality!

The reputation of Canadian wheat on the markets of the world is due to the efforts western farmers have made to keep up the quality of their production.

And the reputation of United Grain Growers is similarly based on unrelenting efforts to keep up the quality of its services to farmers in handling their grain and furnishing them with farm supplies.

Wheat Prices And Economic Experiment

International experts of the wheat advisory commission have been engaged, at Rome, in studying ways and means of raising wheat prices, and, according to press despatches of recent date, have reached decisions which will be submitted to the governments of the signatory countries for approval and it is presumed, concerted action. Decisions, it is stated, must be ratified in time to permit their implementation by June 1.

Details of the plan which have emanated, so far, from the conference at Rome, are not complete enough to warrant analysis with a view to computing their effects. Apparently, however, it is proposed to employ a price-fixing system to regulate exports rather than the commoner process of regulating exports to control price fluctuations. Apparently, too, the intention is to base the minimum price of wheat on the relation between export supplies and the month to month demand, with the London quotes rigorously adhered to by the exporting countries.

Nothing has been said so far as to the price objective. Undoubtedly, however, unless it be the 63.02 gold cent price computed as the "average" price of all parcels of imported wheat of all grades sold during each week in all the ports of Great Britain, the terms of the London agreement, as they apply to the exporting countries, will be rendered nugatory. This is the price which, according to the agreement, must be reached and maintained over a period of sixteen weeks, before sealing down of customs tariffs begins.

Western Canada awaits with interest and expectation complete details of the proposals drafted by the experts for submission to the signatory nations. Price, of course, is a matter of paramount importance to the farmers of the prairie provinces, and if, by agreement, the world price can be raised and stabilized, a long step has been taken towards stabilizing the agricultural industry in Western Canada. It is impossible here to talk of lowering production costs while debt and other charges remain as a high and uncontrollable overhead factor in them.

Of scarcely less significance to the prairie farmer is the matter of lower customs duties against Canadian wheat in the importing countries of Europe. If, then, in addition to raising world prices, there is an adjustment downward of tariffs associated with wholehearted efforts by the importing countries to increase consumption of wheat and at the same time to reduce domestic production, western agriculture may assume with some hope of fulfillment and success, the task of ousting itself to the new economic objective. That is to say, if the spirit of the London agreement is observed to the letter of its various terms, there is no obvious reason why, once the carryovers are disposed of, Canada's export quota should not progressively increase pari passu with her ability to consume the products of imported indigenous to her best customers. Signs already are conspicuous that the ultimate determination of positive or negative reaction to the terms of the London agreement by the importing countries will be the "balance of trade".

Throughout the world a series of exceedingly interesting and vitally important economic experiments are underway. With the various nations engaged in concerted efforts to set their own productive processes in order, the United States is seeking property and stability through the agency of the Roosevelt "New Deal". Mussolini has his cooperative state with industry, organized on a national basis, acting as "economic advisor" of the government. Germany is essaying recovery through a process of state intervention, and Austria apparently is preparing to adopt the Italian model. Russia, of course, is seeking to gear the productive machine to the needs of her people, through socialization. In Britain, the means to recovery is styled "internationalism". All the experiments have one element in common—government intervention, government control and government regulation. The same trend is patent in Canada, for recent legislation has laid foundations for a wide range of machinery for control and regulation, which is to be erected and made operative as conditions determine.

Smothering Sensations Faint and Dizzy Spells

Those feelings of faintness; those dizzy spells; those all-gone smothering, stifling sensations which come over people from time to time, are warnings that should not go unheeded. They indicate an extremely weakened condition of the nerves and other vital organs and should be remedied at once. The suffering in this case will find in Milburn's H. and N. Pills a remedy with which to recuperate their health, build up their run-down system, and bring back their bodily vigor.

Ask your druggist for Milburn's H. and N. Pills.

Thousand Miles An Hour

Astonishing Things Predicted By Sir Charles Kingsford-Smith

Whirling through the stratosphere at well over a thousand miles an hour in the hermetically-sealed cabin of a giant air liner, guided entirely by wireless control stations on earth—can you imagine the possibility. Sir Charles Kingsford-Smith, hero of the recent record-smashing flight to Australia, believes this not only possible, but likely. In an astonishing vision of aerial development within the next fifty years he foresees air travel brought to such a pitch that ships and railways will become semi-obsolete, their sole use being as carriers of heavy freight.

"There will be no human pilot, but gyroscopic control," said Sir Charles. "The huge flying liners which will move through the stratosphere at a uniform speed of 1,200 miles an hour, carrying 100 passengers in their luxurious cabins, will be fitted with super-efficiency, super-charged engines and variable pitch propellers.

"Risk will be negligible. Each plane will have ten, twelve or fifteen engines, all in the event of one cutting off, the officer in charge will simply detach that engine from the propeller while the mechanics repair it en route. Crude oil will probably be used as fuel."

Actually, to accomplish the amazing speed of which Sir Charles speaks we do not require more powerful engines than some already built. The atmospheric density 60,000 feet above the earth is about a quarter of what it is here, so that an engine, which under normal conditions to-day attains the high speed of 350 miles an hour, would hurtle through the rarefied atmosphere at 1,400 miles an hour.

Rich Collection For Museum

B.C. University Receives Rare Specimens From Dr. Fraser

The University of British Columbia will be enriched by a collection of hundreds of species of marine life, many hitherto unknown to science as a result of an 8,500-mile cruise through the south Pacific by a scientific party of which Dr. C. McLean Fraser, professor of zoology, was a member.

Dr. Fraser returned to Vancouver after an absence of three months. He declared that the expedition involved very little romance, but much hard work. He expects the discoveries made in the comparatively virgin scientific field off the coast of South America will have important bearings in the study of marine flora and fauna.

The specimens collected ranged from snakes and monkeys found on shore to sea serpents, brilliantly tinted "angels" fish and crustaceans. Dr. Fraser, being a water expert on a minute form of sea life known as hydroids, brought back a large number of formerly unknown types for the university museum.

PRICES RISE BUT TEA STILL MOST ECONOMICAL

Three years of disastrously low prices for tea finally galled the growers, into action and committees were formed a few months ago to control production. Prices have already advanced and as soon as merchants have exhausted their present stocks the housewife will have to pay slightly more for her favourite beverage. Finest teas such as "Sardina" still produce about 5 cents for a cent.

A Double Nasturtium

New Flower Developed By Successor To Luther Burbank

A double nasturtium that "looks like an egg and tastes in color from lemon yellow to scarlet," has been developed at Philadelphia.

It was created by David Burpee, who has continued the work of Luther Burbank in developing new varieties of plants.

The new flower has attracted considerable attention at the recent local flower shows, where they have been called "the poor man's orchid."

First book printed in America was the "Bocha Espiritual de San Juan Chimo," no copies are known to be in existence.

Quick Relief Now From Neuralgia

JACK, I'VE TO SEE CLARK ABOUT THAT BIG ORDER IN 40 MINUTES AND I HAVE TERRIBLE NEURALGIA. WHAT CAN I DO?

DON'T WORRY! GET SOME ASPIRIN. TWO TABLETS WILL STOP THAT PAIN IN A FEW MINUTES.

2 LATER
WELL, JACK, I GOT THE ORDER! YES, FELT FIT AS A FIDDLE... YOU BET I'LL ALWAYS GET ASPIRIN WHEN I WANT QUICK RELIEF FROM PAIN.

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, toothache, the instant safe relief, it is said, get discovered.

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The disintegration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And then is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

WHY ASPIRIN WORKS SO FAST
Drop an Aspirin Tablet in a glass of water. Note that BILLYE it dissolves fast. What it does in this glass it does in your stomach. Hence its fast action.

Heavy Tourist Trade

Estimated Americans Spend \$77,250,000 In Canada In One Year

Travel between the United States and Canada is greater than over any other international boundary in the world, according to a return just issued by the Canadian government dealing with the tourist traffic of Canada. During 1933 the number of automobiles from the United States which entered Canada for touring purposes was 3,096,887. Of these, 2,233,418 were admitted for a period not exceeding 24 hours; 863,136 for a period not exceeding 60 days; and 333 for a period not exceeding six months. Total expenditures by visitors by automobile from the United States during the year are placed at \$77,250,000 in Canada funds.

Historic Treasure Prized

Old Sword Once Flashed At Battle Of Waterloo

An historic sword once flashed in battle under the colors of King Louis XVI, of France is a relic highly treasured today by Auguste de la Tremandine, who was established at Montmartre, Sask., 1893.

It is the sword of Baron de la Villeneuve, Tremandine's grand-uncle, who was breasted lieutenant by Louis XVI, in 1785. The baron took part in all the campaigns of Louis XVI, including those of Napoleon on the march to and from Moscow, the battle of Waterloo and the defeat of Bonaparte. He died in 1816 and the sword passed on to Tremandine.

The 94-year-old pioneer of this little village migrated from France in 1873 and established his home at Chrysostom, Chautauque county, Quebec. He moved west 20 years later.

Like Good Old Days

Useful Home Production Idea Revived By Alberta Settlers

The "good old days" have come back to the rural district of Erskine, Alberta, with a return to useful home production. The same custom that has chopped a generous supply of wood for the summer months also runs a chopper that grinds wheat into breakfast food. From hickies men fashion everything from moccasins to coats.

Sugar beets provide syrup which, combined with yeast, gives the settler vinegar, and women, as prolific in the knitting of socks, sweaters and caps, have revived talk of the old spinning wheel.

Yacht Cup Race

Mrs. Sopwith Will Act As Timekeeper On The Endeavor

Mrs. T. D. Sopwith, who will act as timekeeper on her husband's challenging yacht, the Endeavor, when it attempts to wrest the America's cup from the United States this summer off Newport, R.I., is anticipating the thrill of her life.

In every race of the series she will stand close beside Mr. Sopwith at the wheel, a stop-watch grasped in either hand, advising him to the second the time the Endeavor has made on each leg of the run, the time of its opponent, how they stand. It's important.

"I wouldn't miss it for anything in the world," she told the Associated Press when interviewed at the Sopwiths' handsome town residence in Park Lane. "I always act as timekeeper in our races, but this, of course, will be the biggest of all."

"You may be sure I won't wear trousers," she said. "Just a skirt and blouse and jacket. If there's a heavy sea I have a waterproof."

School Age At Eight

Children should not be permitted to go to school until they reached the age of eight, in the opinion of Dr. Laurence P. Folsom, president of the New England Council of Ophthalmologists. "The eyes of the human being," he says, "do not reach the state of maturity until the child is eight years of age, and much of the unnecessary strain to which we subject the eyes of children in the classroom should be avoided to insure healthy eyes among the future generations."

Figures Recently Released Show The Important Position Held By Agriculture In Canada

A graphic illustration of the increase in farm production in Canada since 1880 is found in figures compiled by the Dominion Bureau of Statistics.

Production of wheat, the great staple crop, mounted from 42 million bushels in 1880 to over 120 million bushels in 1930, an increase of tenfold. The increase of oat harvests from 83 million to 123 million bushels was over fivefold. Other grains although grown on a smaller scale have shown even greater relative advances. The rate of increase of field crop production has been much greater than that of animal products. Livestock and animal products have roughly doubled in the same period. Cattle sold and slaughtered have increased from 958,000 to over 2,000,000 and swine sold and slaughtered have risen from 1,800,000 to 3,800,000. Production of milk and eggs has likewise been doubled. The area of field crops, given as 15.6 million acres in 1880, had grown to 58 million acres in 1931, an increase of 272 per cent. during the forty-one years.

In 1880 the total agricultural output was valued at 294 million dollars, with the mineral output valued at 17 millions, and the manufactures amounting to 470 million dollars. Agricultural production in 1930 had risen to 1,268 million dollars, mineral production to 280 millions, and the value of manufactures to 3,429 millions. Although the value of agricultural products relative to manufactured products fell from 62 per cent. to 37 per cent., as industrialization gradually expanded, the growth of manufacturing depended in no small part upon expansion in agriculture. In 1931 the value of farm products used by manufacturers was over 30 per cent. of the value of all materials used, and approximately 25 per cent. of the gross value of products manufactured was accounted for by manufacturers of Canadian farm origin.

About 17 per cent. of the value of all export trade in 1880 was made up of wheat, barley, oats, rye, seeds, vegetables, fruits, tobacco, hay, cattle, hides and skins, milk and cream. These products formed 25 per cent. of the value of all exports in 1930.

People Becoming Robots

Small Per Centage Are Thinkers In This Machine Age

Sir Ernest Benn, speaking at a luncheon of the Incorporated Sales Managers' Association in London, declared that there were not 2,000,000 people in the world who could think. The youngster of today, he said, starts in an education machine which is a mass-production machine. When he goes to work his whole life must be regulated. Outside his work he reads a newspaper produced to attract the coppers of the million. He listens to the wireless, and has the soul-destroying experience of knowing that he is applying his heart and mind so far as he has got any to the same tune or words that a million others are absorbing. He goes to the cinema, and, whether he likes it or not, absorbs all the atrocities that come out of Hollywood. This young man is being compelled to become a Robot in a fatalistic scheme of things which must cause him to believe that he can count for very little. In Russia and Italy the people were doomed to ignorance by order. The same process was beginning in Germany.

Predicts Many Icebergs

Lieutenant Commander Edward H. Smith, United States Coast Guard, an expert on icebergs, predicts that this year approximately 830 icebergs will come south of Newfoundland toward the Atlantic ship lanes. He has been studying meteorological conditions for several months in European and North Atlantic countries.

It was not until after the civil war in the U.S. that the tomato reached the northern states, although well-known in the south.

W. N. U. 2014

Moscow Has Problem

Market Overstocked With Canned Food People Refuse To Eat
Volrus steak, canned whale meat, Arctic hare and horse are recognized if infrequent entries on the Russian menu, but canned corn, never! Over that homely staple of American diet the Soviet food-purveyors have made one of their most entertaining bad guesses.

Canned corn, excellent in quality and, to the American palate, a tasty change in a land where vegetables are few, arrived on the Moscow market some months ago. It's estimated there were some 2,500,000 tins of the novelty.

Now, with another spring just ahead the storekeepers are faced with the critical question: what to do with the stuff, for the Russian palate has decided corn is a food for animals only, and though American residents have bought their fair share of the crop, the bulk of the cans remains unmovable on the shelves.

Recently there's been correspondence in the English language *Voskov* Daily News, which summarizes the situation, and gives some reasons for it.

"The citizens of Moscow may have a prejudice against canned food," suggests the writer. "Secondly, it seems that Russians think corn is not a food for men. Thirdly, the directions on Soviet canned corn call for milk, butter and other articles which are not any too plentiful at present."

Soon another spring will come, summer pass and in the fall of this year one can picture another flood of canned corn let loose on the market. It will join the hundreds of thousands of cans remaining on the shelves, unless action is taken. Corn flakes will be on the market soon and they, too, will stare from the store windows and shiver from the cold reception they will receive."

And the writer suggests advertising something not produced in the Soviet Union—and perhaps an "out-movement" campaign by the authorities.

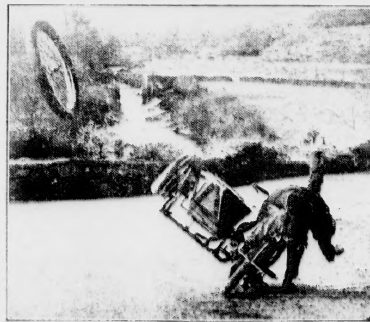

Large Meat Consumption

Great Britain Has Highest Average And Italy Lowest

We cannot vouch for the figures that follow but they seem to come from a trustworthy source. Large slaughter-houses in this country number 1,659 besides innumerable small local killing places. Four-footed animals killed for food number 120 millions, not including those butchered on farms and in small local butcheries. The average amount of meat eaten in the United States was 145 pounds in 1921, a decrease of about 20 pounds per person since 1900. Europe's average consumption is around 170 pounds per person. Great Britain averages the highest, Italy's the lowest; Japan's consumption is 15 pounds per person for a year and 25 pounds of fish. In large sections of the world practically no meat is eaten because of religious scruples. Our Dumb Animals.

Three British doctors recently succeeded in isolating the virus of influenza.

SOME PHOTOGRAPHERS ARE LUCKY

The press photographer who "shot" this picture admitted it was his lucky day, and we agree with him. A motorcyclist travelling down Newbridge Hill over the River Dart, in Devonshire, suddenly stopped as the wheel of his silent vent flying through the air, and the photographer received the shutter of his camera at the critical moment.

Britain Has Met New World Conditions With Less Violent Change Than Other Countries

Figures Are Discouraging

Highway Accidents In Canada Increasing At Alarming Rate

Ontario drivers are not maintaining the safety record they set up during 1932. According to figures issued by the Motor Vehicles Branch of the Ontario Department of Highways, the number of reported accidents in February showed an eight per cent. increase over the same period last year, and it was during clear weather, under favorable conditions, that the increase occurred.

If there were any indication anywhere that the Canadian motorist was beginning to learn how to drive in safety, the figures on traffic fatalities would not be so discouraging. We could say in that case, that the long list of deaths could simply be because the motor car still was a relatively new bit of machinery, and that things would work themselves out, once everybody got the hang of it.

But we can't say that. Far from learning to handle our cars safely, we are making a worse record now than five years ago.

This can mean only one thing; that we are actually driving with less care today than we were five years ago. Far from learning to handle these new machines, we are getting worse. Fatalities are increasing at a discouraging rate.—*Gloucester Mercury.*

Timothy Seed Production

Production In Canada Is Still Considerably Short Of Requirements

Domestic production of timothy seed in Canada is still far short of consumption, so that still further production of this crop may be encouraged. According to the Agricultural Situation Bulletin, timothy ordinarily yields from 200 to 300 pounds of seed per acre, and growers have received on an average about 61 1/2 cents per pound for the seed basis No. 1 grade, over the past three years. Canada uses annually about 10 million pounds of timothy seed and until 1931 some 9 million pounds of this was imported from the United States. Domestic production since 1931 has been greatly stimulated by educational activities and the prospect of a large home market. As a result, production increased from less than a million pounds to some five million pounds in 1932, but declined to about 2,700,000 pounds in 1933 due to unfavorable weather conditions.

Would Remain Canadians

A resolution urging that Canadian women married to foreigners and continuing to reside in Canada be allowed to retain their nationality was passed at a meeting of the Canadian Alliance for Women's Vote in Quebec, under the presidency of Miss Idola Saint Jean. The resolution was forwarded to Premier R. B. Bennett.

Walter Elliot, the British Minister of Agriculture, in his recent important work, which would of the "Western Britain" series, make some particularly interesting observations which have application to Canada as well as to Great Britain. He describes agriculture as still the "greatest" industry in Great Britain and being in danger of dying from a sort of liberty. "Any man is free to grow anything he liked here under any conditions, and any man is free to grow anything he liked anywhere abroad and sell it on equally excellent any conditions." And it pointed out: "The liberty to grow anything, and the liberty to buy everything, are clearly not working out satisfactorily in practice." This has led to the voluntary discipline of British agriculturists, who have accepted the boards set up under the Marketing Acts. Mr. Elliot has acknowledged frankly that his method is one of trial and error, but it is already meeting with some success, and he claims that Great Britain has met the new world situation with less violent change than any other country. He faces and accepts the world move towards economic nationalism, and believes that "the Western countries will have to solve in future the problem of their own economic life, rather than have done in the last few years."

Mr. Elliot uttered a profound truth which applies to Canada as much as it does to Great Britain, when he observed: "Statistics every day make national units more self-contained, and make it only not less advisable but less possible for this country—or for any country—to obtain prosperity by putting all that it makes on wheels and running it off to the end of the earth." It is surely obvious that the present movement towards what is called economic nationalism can hardly be arrested, and it must become increasingly difficult for Western countries to preserve their present standards of living. But the nations of the British Empire, if they co-operate fully and wisely, have the soundest prospects of individual prosperity. As Mr. Elliot observed: "It is not so much a matter of government as of leadership." From Canada, London, Eng.

Egg Grading Regulations

Revision In Effect For Most Of The Provinces Of Canada

The revised egg regulations are now legally in effect for domestic trading in all the provinces of Canada with the exception of Prince Edward Island and New Brunswick, and, according to general reports, the new standards are being found much more satisfactory than the old ones. One point which shippers should bear in mind, says the Department of Agriculture Egg and Market Poultry Review, is that all eggs in the different weights of grade A are required to be "clean." Clean means free from dirt or stain. There has been some tendency to place "reasonably clean" eggs in the grade on the assumption that grade A medium replaces the old grade of Firsts. The requirements for cleanliness in grade A medium and grade A pullet are precisely the same as in grade A large. "Reasonably clean" eggs, which in the past went into the grade of Firsts, come into grade B. Cracked eggs are required to be packed separately and marked "Cracks."

Honesty Of The Orient

Japan paid 2,000,000 gold francs to the League of Nations and officially interpreted the action as meaning that, though that country resigned from the league, it intends to pay its obligations promptly while still legally a member. The payment cheered league circles considerably because some other countries owe a total of some 22,000,000 francs in membership fees.

The black-topped illustrations of the Falkland Islands lay eggs as large as dinner plates.

How to Seed Down.

In a northerly region of limited precipitation one of the knottiest cropping problems is how to lay land down to meadow crops. The practice of seeding with a nurse-crop results poorly, since the large-kernelled cereal produces a plant that soon crowds the fine grass or clover seedling, robbing the latter of needed moisture and plant food, so that unless the season be exceptionally favorable it makes a spindling growth. After harvest in late August or in September the weather is often cool, dry and windy, hence autumn growth of the meadow plantlets is much less than in climates with a longer interval before the dormant season. Even if the tender seedlings escape winter's wrath—as nurse-crop seedlings of unimmaculated legumes are quite unlikely to do—they still make tardy progress in the following spring, competing weakly with the native and other weeds that are always lying in wait.

Appreciating this problem the Dominion Experimental Substation at Beaverlodge, Alberta, according to Superintendent Albright, has concentrated upon it almost from the beginning, seeding thousands of plots by competitive methods during the past sixteen years.

Meadow plots seeded alone and hand-weeded in the initial season have in the ensuing season seldom failed to return from two to four times as much hay as nurse-crop seedings, although it must be conceded that the difference in hay tonnage seldom equals the weight of the nurse-crop. On the other hand nurse-crop seedings sometimes fall outright and are often weedy. Non-nurse-crop seedings left unattended produce prolific crops of weed-seeds in the initial season.

To get around the expense of handweeding the plan was tried of seeding alone during May or June, pasturing closely when the ground was firm enough, until early August, in order to keep annual weeds down and then taking the stock off completely to permit the young stand to form a good top for winter protection. Areas thus treated, while falling short of the yields of hand-weeded plots, have turned reasonably good crops of comparatively clean hay. The plan could not be expected to work on stinkweed areas, and it remains to be seen how it may work out in a rotation where seeding is repeatedly done in this way. Thus far it has been fairly successful in the control of edible weeds like lamb's quarter, buckwheat, and shepherd's purse. The pasturing, however, must be judiciously supervised.

BERGEN—NICHE VALLEY

The W.I. will hold a quilt sale at the Hall June 1 (tomorrow).

Fred Admussen is putting in Joe Young's crop this year.

The good rain Sunday week will bring on the crops in good shape.

Eidsvold school district received \$625 insurance on the building that burned April 23. The rebuilding will start about June 13 or as soon as the plans are approved.

Camping Days are Here.

Last week saw a number of camping parties hitting for the tall timber, and the weather proved to be ideal.

Bill Ranton, Cyril Sharran, Don Philipson and Clarence Cunningham were camping at Bergen.

Alfie Brusso and Frank Raymond were at the mouth of the Fallen River, and Elmer Evans and Ormond Phillipson are camping for a few days at Coal Camp on the Red Deer.

Demise.

J. C. WATERSTREET.

Largely attended funeral services for Joseph C. Waterstreet, aged 73, resident of Big Prairie for a number of years, were held Friday afternoon last at Carstairs, Rev. F. Vinsett officiating. Interment followed in the Carstairs cemetery.

Pallbearers from Didsbury Lodge No. 18, I.O.O.F. were C. H. Adhead, F. Kaufman, D. Edwards, J. E. Gooder, G. Liesemer, and A. V. Backler.

He is survived by his wife, Susan; three sons: Arthur, Casper and Theodore; four daughters: Mrs. Percy Warthrop, Mrs. L. Rogan, Mrs. Jack Rogan and Mrs. Alvin Ploger; also three brothers, one sister and nine grandchildren.

CARD OF THANKS

We desire to thank all our friends and neighbors for their kind sympathy shown in many ways during the illness of Mr. Watson. We also tender thanks to Dr. Clarke and the nursing staff of the Didsbury General Hospital.

—Mr. and Mrs. Geo. Watson.

\$750,000 for Alberta Roads

Alberta and Saskatchewan will be assisted by the federal treasury with loans up to \$750,000 each to enable them to proceed with roadbuilding operations this year, according to orders-in-council passed under the relief act and made public recently. The amounts will be advanced as the work proceeds and will be secured by provincial treasury bills at 5% interest. Orders-in-council passed under the Relief Act and made public May 21 disclose that a further loan of \$600,000 on provincial treasury bills at 5% maturing May 28, 1935 will be made by the federal treasury to enable Manitoba to consolidate two similar loans maturing in May and June of this year. The maturing loans are from \$500,000 expiring May 28, and \$100,000 expiring June 15. A loan of \$294,000 has also been authorized to assist the Manitoba government in meeting its share of relief costs during May and June of this year.

Rev. Geo. A. Dickson Resigns Post

In the presence of a capacity congregation Sunday morning (20th), the Rev. George A. Dickson, D.D., minister of Knox United Church, Calgary for more than ten years, announced to his people his decision to accept a call from Metropolitan United Church, Toronto.

Engagement is Announced.

Mr. and Mrs. George H. Liesemer, of Didsbury, announce the engagement of their younger daughter, Orpha Marguerite, to Mr. Howard Duane Halliday. The marriage will take place the latter part of June.—Calgary Herald.

Annual Feeders' Day Lacombe, June 6th.

The Central Alberta Livestock Feeders' Association are holding their annual feeders' day at Lacombe, Wednesday, June 6. Some 2,000 range cattle and 3,000 range lambs were fed under contract in Central Alberta during the past winter. This stock has made good money for both the rancher and feeder.

The program starts with lunch at the Experimental Station, to be followed by short talks dealing with different phases of livestock feeding and marketing, by prominent livestock men who are well qualified to deal with the subject under discussion. This will be followed by a short visit to a few of the feed-lots of the district.

The annual meeting of the Central Alberta Livestock Feeders' Association will be held during the evening in Lacombe Town Hall at 8 o'clock.

Melvin Notes

Mr. Glen Johnston of Cremona visited with his parents Tuesday. Misses Dorothy Youngs and Marian Johnston spent Saturday with Mrs. Ralph Jackson.

Mr. and Mrs. John Clarke spent Sunday afternoon with Mr. and Mrs. Hosgood.

Mr. and Mrs. Tom Duncan and Bessie spent Tuesday with Mr. and Mrs. George Youngs.

Mr. and Mrs. Peter Johnston visited the former's brother at Drumheller on Tuesday, but found them in ill health. They also called on Dr. and Mrs. Sawdon at Three Hills.

The schoolchildren motored to Westcott on Monday evening and played a game of softball with the Westcott school, the latter winning the encounter. A return game will be played on the Go-Getters' sports grounds May 31st at 7 p.m.

Melvin Go-Getters opened their Saturday afternoon sports last Saturday. The first ball game was played between Spingside and Melvin, with Melvin the victors. Everybody welcome at the Sports Grounds each Saturday afternoon!

BASEBALL.

ROSEBUD LEAGUE
Innisfail 7 Didsbury 4

Playing at Innisfail Monday night the Didsbury baseball boys met with defeat in a fast and snappy game.

Didsbury showed a decided improvement from former games, Ray Stouffer and George Geiger doing the hurling. Stouffer was forced to quit at the end of the third inning owing to a sore arm. Geiger held the mound throughout the rest of the game and was pitching great ball when the game was called on account of darkness at the end of the 7th.

A triple play pulled by Charlie Geiger and Eddie Buhur with two men on bases and nobody out was the feature of the game.

Didsbury: R. Lyons, F. Evans, R. Bahr, C. Geiger, L. Beresht, R. Holub, Bob Gonder, I. Jenkins, R. Stouffer and G. Geiger.

Glamor of the Circus at Calgary, June 4th

Get ready, the circus is coming to Calgary on Monday! Al. G. Barnes' show, one of the world's largest will exhibit in Calgary that day.

Three special trains are used this season to transport this great organization from city to city. Travelling with it are 1,080 employees in addition to 108 advance men. Twenty-two tents covering 12 acres of land house the transient city in the daytime. So hoop-la, here we are—all the fun of the big rings. Wild animals, clowns, elephants, and the wonder spectacle of all time, "Fiesta of the Rio Grande."

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Minton, his former roommate with whom he has quarrelled. At a party at an exclusive club Peter entertains Camilla's guests with impersonations. When the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Roseman and Wooley, an advertising agency, where Camilla has submitted some of her work, send for her to offer her a salary of \$50.00 a week to start and a prospect of having it doubled. She tells Peter of this good fortune in securing employment. Mrs. Hoyt is also informed that Camilla has obtained work and is going to leave the Hoyt household. Avis Werth rents a studio on the same floor as Peter, and invites him to have lunch there. He accepts reluctantly, but is favorably impressed with his visit. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and goes to work. After Camilla has gone from the studio, Avis calls up and persuades Peter to accept a loan of \$1,000.

(Now Go On With The Story)

CHAPTER XXI

Camilla told Rose then of the disagreement between Peter and herself. She found some relief from her confidence in a sympathetic listener. Rose nodded soberly. "I expected it. You might have known it would not work out."

"But, Rose, if this way doesn't, what would? It seemed to be the best plan in every way."

"The best plan would have been to wait until Peter was established before you married," emphatically.

"But that might be for years. And we love each other so!"

"Sure, that's just the trouble, no matter what class the man is in or whether it's a case of love or duty. The next best thing in your case would have been for you to let Peter take care of you and make the best

"Blue" Spells

Reduce some women to the pensive shadow of their own smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. It steadies quivering nerves, helps to tone up the general health, gives them more pep — a more cheerful.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

W. N. U. 2044

3 MONTHS ON BISCUITS AND MILK

Woman's Digestive Troubles

Everyone who is subject to any form of indigestion should know of this woman's experience. Advice from one who has had such severe attacks is advice worth having. She writes:

"I suffered from indigestion, gastritis and constipation, and was so very ill. I had ten medical advisers to live on soda biscuits and milk for three months. Well, a friend advised me to take Crutchen, and now I am pleased to say my troubles are ended. I can eat and enjoy a good meal without any painful after-effects. My skin is clear, in fact, quite clear, and there is no sign of constipation. I would advise anyone suffering with the same to take Crutchen." (Mrs.) M. R. L.

The immediate effect of the six salts in Crutchen is to promote a natural flow of the digestive and other vital juices of the body. Soon after you start on Crutchen you will find that you are able to enjoy your food without any distressing after-effects. And as you persevere with the "little daily dose," you will see that the relief which Crutchen brings is lasting relief.

That will be much better and save me a lot of time." She was collecting her things as she talked. She stood before the mirror and adjusted a red velvet over her soft black hair, buttoned the collar of a rose-colored under her chin. "Chilly out, isn't it?" she asked Peter.

"Rather," he replied. "You don't mind going out alone?"

"I should say not. It's early yet. Well, goodbye, you two. See that you treat our guest right," she admonished Camilla with a shy wink.

"Nice kid," said Peter, when she had gone. "Too bad she hadn't a chance like you."

"I don't know. In many ways, she is wiser than I. I envy her sometimes."

"Camilla, I came to apologize for the other day. I'm terribly sorry," he confessed.

"So am I, Peter. But that's all over. Let's forget it even happened." She was in his arms, with her arms around his neck, close.

"My precious! I wish it hadn't happened. But we'll start all over again, just as if it hadn't. Except please, dear, don't say any more about that." Which is the way men apologize and repeat with no restrictions or concessions. They may regret what has happened, but somehow the woman is still wrong in their opinion.

But like all women in love, it was Camilla who said that he once again held her close instead of drawing away from her, that his eyes looked deep into hers with confidence.

"It was I who had the blackie-lips that time. I haven't felt so low as long as I can remember. But everything is going to work out all right, somehow." His optimism was a happy surprise to Camilla. Here, therefore, it had been she who encouraged him. This mood must be the rebound from the depths of his recent despair. It was so delicious to relax in his arms and at the buoyancy of his mood.

"You just forget that the idea of thing you are doing can't be accomplished in a minute. And the best things in life always take time to accomplish."

"I don't mind waiting for a reasonable time, but I get panicky sometimes when I think about some of the old boys of the past who had to die before the world would recognize them. I may not be a genius in the class, but look at the fellows like

Rheumatism

Is caused by failure of kidneys to remove uric acid poisons from the blood. GIN Pills relieve by neutralizing uric acid and restoring the kidneys to normal action—see a box at all druggists.

MADE IN CANADA BY THE GIN PILLS CO. LTD. TORONTO, CANADA

Paraphrase. He died penniless and writing a play that has survived for two centuries."

"Tell me about him. I don't know the story," Camilla prompted.

"His story fits plenty of others like him. But he wrote his masterpiece in his childhood, when he knew he was doomed to die, and in extreme poverty. The play was a tremendous success from the first, but he lived for only a month after the premiere. Imagine the irony of that—audiences coming at the height of his life while he suffered the last agonies of a slow death. And the play is still a success just revived in London last season and made such a big hit that they're bringing it to America. Such is fame!"

"But, darling, genius gets a better break these days than it did two centuries ago."

He nodded. "That's what makes the struggle worth while, that, and hoping that even if I'm not recognized while I'm living, I might produce something that would add to the beauty of the future. Sculpture is more enduring, at least, than a book or a picture that can be broken away or lost."

Had Camilla known what Peter sustained his hope and confidence, she might have been less happy in sharing it. But she supposed that Peter naturally buoyant nature had righted itself in his conviction over their quarrel and that he had worked out his problem to satisfy his own peculiar pride. She did not know that he had died that evening with Avis, and had brought away with him some of her faith in himself and her own ultimate victory.

She was to discover in the days which followed that if you once put love away for even a little while, and then take it out again it is never the same. It is like a flower that is so fragrant and beautiful that you want to keep it forever and put it away between the pages of a book to treasure with memories; but when you take it out again it is not at all the same gorgeous thing that you once had in your hands.

(To Be Continued)

Little Helps For This Week

"I was afraid and went and hid thy talent in the earth, he there thou hast that is thine." Matthew 25:25.

Time was I shrank from what was right.

From fear of what was wrong; I would not brave the sacred right.

Because the foe was strong.

But now I cast that timid shade And sober shame aside; Such dread of sin was indolence, Such aim at heaven was pride.

J. H. Stoddard.

If the really decent man falls into some error he does not feel over it, but rising up with a humble spirit he goes anew on his way rejoicing. Were he to fall a hundred times in the day he would not despair, he would rather cry out lovingly to God appealing to His tender mercy and pity. The really decent man has a horror of evil, but he has still greater love for that which is good, he is more set on doing right than avoiding wrong. Generous, large-hearted, he is not afraid of danger in saving God, and would rather run the risk of doing his will imperfectly than not strive to serve Him lest he fail in the attempt. Jean Nicolson Gray.

New Russian Loan

Big Domestic Loan Running Ten Years Announced By Soviet Government

The issuance of a new domestic loan, aggregating 2,500,000,000 roubles, and amounting to loans, has been announced by the Soviet government.

It will be known as "the loan of the second year of the second five-year plan" and carries the optional choice of either a lottery or interest-bearing bonds, which will pay 10 per cent. annually.

A panhandler approached a business man. "Let me have a dollar for a bite to eat, will you?" he asked.

"No, no," replied the man. "For a bite to eat?"

"Just say 'good or bad'!" replied the tramp. "I don't feel like how to run my business."

I DREADED THE THOUGHT OF GREASY POTS AND PANS UNTIL I USED

It cuts through grease—makes messy kitchen jobs easy!

DON'T be a slave to kitchen chores. Just use a solution of one teaspoonful of Gillett's Pure Flake Lye dissolved in a quart of cold water. It puts an end to stubborn stains. Lifts grease and grime off like magic!

Gillett's Lye is indispensable for all your heavy cleaning . . . for stopp' up drains . . . for toilet bowls. Order a tin from your grocer today. Say good-bye to hard rubbing and scrubbing!

"Never dissolve lye in hot water. The action of the lye is lost in the water."

Burnside Notes.

Messrs. Percy Saunders and Noah Eckel spent Wednesday afternoon in Olds.

Miss Edna Sittler was a Monday evening visitor with Mrs. Otto Bittner.

Mr. and Mrs. Albert Arlenson spent Sunday at Sunnyslope with Mr. and Mrs. E. R. Dawson.

Mr. and Mrs. Chris Ehret and family spent Sunday evening with the latter's parents at Torrington.

Mr. George Metz, Fred and Bertie, Miss Edna Sittler and Earl Dodels were Sunday evening visitors with Mr. and Mrs. B. Woods.

Mr. and Mrs. Leon Dollare mourning the loss of their 7 weeks' old baby daughter who succumbed early Saturday morning to an attack of whooping-cough.

The people of Burnside school district should be proud to have a teacher in their midst whose abilities have made this one of the best rural schools in the inspectorate. We congratulate Mr. Arlenson on his excellent report and sincerely hope that he will make the coming school year his seventh at Burnside.

EVANGELICAL NOTES

The sermon subject on Sunday morning will be, "The Gospel."

The annual congregational meet will be held Monday evening June 4 at 8 o'clock in Knox United Church.

H. M. Reiber was elected by the quarterly conference as delegate to the annual conference which convenes June 27 at Melville, Saskatchewan. J. V. Borchert was nominated as delegate to the general conference which meets at Akron, Ohio in November.

Mrs. C. D. Casey shipped 50 turkeys poulted to Vancouver this week. Mrs. Casey has gained quite a reputation as a breeder of high-grade turkeys.

Mr. Gwyn Richards of Hillcrest visited with Mr. George Hawkes over the weekend. On Friday they motored to Edmonton.

Mr. and Mrs. Wm. Purdy, of the Jones River district, spent the 24th with Mr. and Mrs. Ed Kercher and family.

The C. G. I. T. Girls wish to thank the judges for so kindly assisting in the pet show, and to all those who helped make it successful.

McCormick-Deering New All Steel Manure Spreader at the Same Price as the regular old wood spreader. This is a sensation—just like the new mower! (226)

Mr. A. Melville Anderson, Sight Specialist, of Anderson & McLean, Calgary, will make his next visit to Didsbury on Tuesday, June 5th (226)

Stanley H. Clark, for the past two years provincial game commissioner, has resigned from the government service and is leaving at once to resume the hunting and outfitting business in which he was previously engaged.

The Misses Alice and Mollie Pearson were "at home" to their friends Saturday afternoon last. The treatables were decorated with carnations. Tea was poured by Mrs. Reitzel, Mrs. Evans and Mrs. Gooder, and Mrs. Edwards assisted in serving.

Organized summer activities in the Canadian Rockies will be given an auspicious start this season with the decision of the Oxford Group to hold a house party at Banff Springs Hotel June 5 to 12, with the hotel opening for regular business the following day, and the Chateau Lake Louise, Emerald Lake Chalet and the numerous chalet-bungalow camps nine days later, on June 22. Since the house party held in the Chateau Frontenac at Quebec this spring the Oxford Group movement has steadily gained in momentum, and following the Banff meeting it is estimated that an impressive number of Canadians will sail on the Empress of Australia from Quebec on June 21 to attend the house party to be held in Oxford, England.

MORE than 700 delegates to the Oxford Group House Party held recently at the Chateau Frontenac, Quebec, photographed in the court yard of the famous hostelry. Representatives from all the larger Eastern Canadian and United States cities attended. Another huge House Party is being considered for the Banff Springs Hotel, magnificent Rocky Mountain resort, early in June.
